Shell SP70 Module

Benefits
• PowerMax® mono-crystalline solar cells deliver maximum power output even under reduced light conditions providing more power where space is a limitation.
• The surface of the PowerMax® cell has a pyramidal textured surface to enable more light absorption and deliver exceptional efficiency.
• Highly transparent tempered glass delivers more power and ensures high impact resistance and protection against hail, snow, ice, and storms.
• Nearly 300MW of cumulative installed experience has been applied to the evolution of our mono-crystalline range to ensure that our products have a long and reliable service life backed by a 25 year warranty.

Junction Box
The junction box provides a high quality, dust protected and splash proof IP44-rated housing. The housing contains a rigid connection block with screw terminals and by-pass diodes providing "hot spot" protection for the solar cells.
